**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-5 and 7-19 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Schmeing et al US 5,166,259 or Diehl et al US 2002/0028858.

4. The rejection as set forth under 35 USC 102/103 in the paper mailed 5/27/09 is deemed proper and is herein repeated.

5. Applicant's remarks filed 12/11/09 have been fully considered but have been found not persuasive.

6. Applicant continues to argue that "about 6" is patentably distinct from "about 5." This is not persuasive. It is well established that the term "about" imparts a degree of flexibility with respect to the amount. In the instant case, the difference is a single percent, 5 to 6. The term "about" is used in both the art and the claims. As such, ½

percent flexibility imparted by the term about creates an overlap and the limitation is anticipated. Further, "about 5" is clearly obvious from "about 6" given the similarity and the absence of any unexpected results.

The fact that the art fails to report the Tg does not render claims reciting a Tg range patentable. The claimed "about -50°C to about 60°C is broad and conventional. Copolymers shown in the art routinely have Tg values falling within the claimed range.

As such, the Tg is either anticipated or obvious from the art.
